

Midterm Project Criteria

Be sure to turn in your:

Asset list
Brainstormed story one-liners
List of story actions
Storyboards
Midterm project quicktime movie (or .avi)
Team members with job descriptions next to name

You will be evaluated on:

Modeling – creative and effective modeling for animation and story. Props created or improvised for environment and story liveliness.

Lighting – effective lighting either to display objects well or add mood to environment.

Camera and composition – effective composition using multiple cameras and/or composition of subject/objects in scene to better tell story.

Animation – effective animation where animation is clear, delivers story well.

Rendering – well constructed render approximately 30 seconds to 1 minute in length maximum.

Remember: you are telling a story so be sure that no matter what the story comes first and the technique and application of 3d comes second!
